- eSATA connection cable
- USB connection cable
- Driver CD
- · Installation instructions

Safety instructions

- Do not operate the device in damp or dusty environments
- Do not operate this device on radiators or near heat sources
- This device is designed for indoor use only
- Protect the device from pressure and impact during operation
- Do not open or move the device during operation

1. Installation Instructions

Never disconnect the hard drive from the computer while data is being transferred. You may lose data if you do so.

Under no circumstance does Hama GmbH & Co KG accept liability for loss of data stored on data storage media.

2. Inserting the Hard Drive

Note: Be aware that static electricity can damage both the hard drive and the docking station. Discharge yourself by touching a metal object.

Connect the included power supply unit to the docking station. Then connect the docking station to your PC via USB or eSATA.

Make sure that the toggle switch used for switching the docking station on and off is set to **"Off"** when inserting the hard drive. Next, insert the SATA hard drive into the docking station and switch the toggle switch to **"On"**.

To remove the hard drive, proceed as follows (USB operation):

Click the "Safely Remove Hardware" button in the taskbar.

Then, select **"USB Mass Storage Device"** and click **"Exit"**.

3. Installing the Drivers:

The drivers for the unit are already included in Windows 2000, XP and Vista. The system installs them automatically. The docking station can be used without any further driver installation after connecting and restarting.

4. Backup Software

4.1 Installation
